FOOTWEAR18-35

Our footwear is at the forefront of the safety industry, not just because of all of our safety features, but because it draws a line between those who have our footwear and those who don't.

XT Safety Boots	20-27
Lace up Safety Boots	26-27
Slip on Safety Boots	30-31
Gumboots	31-35
Socks	35

APPAREL36- 77

As a leading apparel and workwear supplier, we have a top range of high quality innovative workwear developed with safety standards and comfort in mind.

Shirts	40-49
Polos	50-59
Singlet	59
Vests	61
Trousers	64-75
Shorts	75-77

OVERALLS80-107

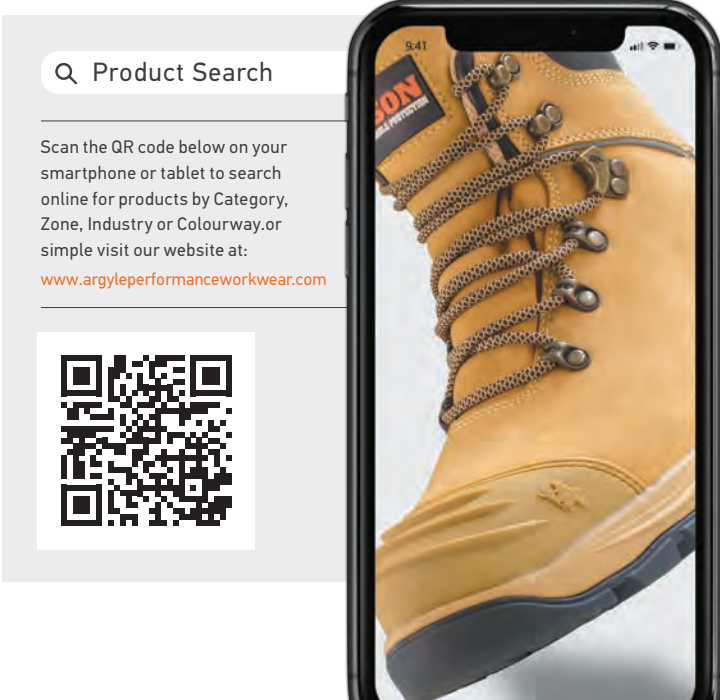

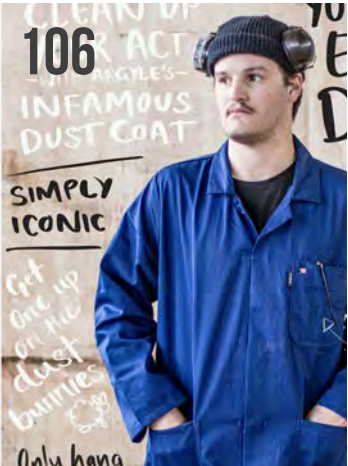

Design features, in style, comfort, durability and innovation set these garments apart. Wear Argyle overalls and you'll know it!

TTMC-W17	86-89
Day/Night	92-93
Day Only	94
Combination	96-100
Bib	104-105
Dustcoats	105-107

RAINWEAR108 - 135

Our range of wet weather products provides the perfect solution for you when it comes to keeping dry. We have committed ourselves to providing you with a wet weather solution.

Jackets	113-128
Vests	129
Bib Overtrouser	130-133
Raintrousers	133-135

HI RISK136-153

Years invested in Research and Development and our meticulous attention to detail has engrained in us an unyielding resolution to design, develop, and deliver the best, most advanced FR garments ever worn.

Inheratex Fabric	140-142
Natural Fibre Fabric	144-145
Flameguard Fabric	146-147
Rigour Fabric	148-149
Argyle FR	150
Arcflash Kits	151-153

FOOD IND154-171

A hygienic environment is crucial to food safety. We have the perfect product range as a solution to minimise contamination when workers go about their daily work duties.

Overalls	158-160
Jerkins	160-164
Dustcoats	164-165
Trouser	165
Smock	165
Gumboot	166-167
Smartzone	168-171

PAINTERS172-175

A range of garments designed for the broad demands of the professional painter and crew.

ALTERATIONS176-181

Includes Accessories, Embroidery, Printing and Branding.

GARMENT SELECTOR BY INDUSTRY182-215

Choosing your workwear is not just about personal preference. Different garments are specifically designed for different jobs to ensure maximum comfort and protection.

Our Story

Established in South Taranaki in 1976 in the shadow of Mount Taranaki. A small family owned business named Tasman Workwear was founded. It sold quality industrial safety boots and clothing to local workmen, and quickly became a trusted and renowned purveyor.

By 1985 the business had grown to include a wholesale division supplying garments to workers nationwide.

Since then the locally owned and operated business has evolved, grown and changed it's name to Argyle Performance Workwear.

The garments are now proudly designed and developed in New Zealand. Our expert team work with the worlds best materials and utilise bespoke fabrics and techniques to deliver our highly acclaimed range. Argyle is a company dedicated to producing workwear that surpasses the highest standards both locally and globally.

The focus has always been to provide workwear that surpasses the needs of the most demanding industries with Argyle's uncompromising standards of comfort and safety. This is a commitment reflected in the company mission statement - Our mission is to Protect and Enhance the Working Life of Everyone we Serve.

Of course Kiwi ingenuity has always been the driving force to create uncompromising performance workwear. This is inherent in the DNA of the Argyle brand and can be summed with our guiding principles of Wearability, Innovation, Safety and Endurance or WISE for short.

DESIGNED & REFINED IN NEW ZEALAND

FROM THE FIRST DRAFT TO FINAL PRODUCT, AND EVERYTHING IN BETWEEN.

Providing professional work wear of the highest standard requires an extensive knowledge base. Ours has grown through time tested relationships and alignments with the most diverse range of industries.

Over time it became obvious that in order to provide consistent quality to a demanding workforce, we'd need to engage kiwi ingenuity rather than just relying on foreign suppliers.

This meant taking things back to the drawing board and developing an in-house New Zealand design team. The process was born of the time tested knowledge and unique understanding of the work wear industry.

The design, research and refinement process is now embedded. It has become instrumental in the creation of innovative work wear across our entire range. As our name suggests, we're a 'performance' brand which means understanding the unique demands of our diverse customer base to enhance their own performance. The 'design and refine' process never ceases, allowing Argyle to continually deliver true improvement and innovation.

FOOTWEAR

ARGYLE INNOVATION & TECHNOLOGY

As leaders in quality, effective and desirable workwear, we have built our success through dedication to provide the best products. Combine this with our full offering of safety advice and exceptional service, we continue to prove that Argyle’s reputation is well deserved.

Garments that use UltraFlect® retro-reflective tape are designed to offer the highest visibility in every situation! This UltraFlect® tape exceeds AS/NZS 1906.4:2010 High visibility materials for safety garments. The UltraFlect® tape used on Arc Rated and Flame Retardant garments is fire retardant and exceeds AS/NZS 4967:2009, Amdt No.1:2010 in addition to the above standard.

- Reflective
- High Visibility

UltraFlect® Stretch tape is the only independently tested and certified AS/NZS 1906.4:2010 retro-reflective stretch tape on the market! This stretch tape has proven to be a superior reflective tape. The tape ensures greater comfort for all wearers by stretching to allow greater flexibility and ease of movement.

- Reflective
- High Visibility
- Stretchable

RIPSTOP

Ripstop fabric, is a woven, lightweight material that has a superior resistance to tearing and ripping. Ripstop is made by weaving threads throughout a base material in interlocking patterns, with the crosshatched threads giving the material an exceptional tear-resistance.

- Rip and Tear Resistant
- Lightweight
- Tough

ENDURA™

Endura is an extremely tough and durable textile, picked especially for the Craftsman pant, giving it the functionality yet longevity that every hard worker needs • Designed for maximum durability • Higher performance versus commodity polyester offerings • Outstanding strength to weight ratio • Exceptional resistance to abrasion, tear, scuffs and punctures.

- Rip and Tear Resistant
- Abrasion Resistant
- Tough

ENDURALITE™

This hard-wearing sturdy material is an extremely tough, durable and lightweight textile, giving it functionality yet longevity. Biodegradable. Exceeds AS 2001.2.25 Abrasion test. Exceeds AS 2001.1.2.3, Tensile Strength test.

- Rip and Tear Resistant
- Abrasion Resistant
- Lightweight
- Tough

TOUGH SCUFF®

We’ve used our EnduraLite fabric insert at the bottom of the trouser to ensure the Titan’s long life and no fraying edges.

- Rip and Tear Resistant
- Abrasion Resistant
- Lightweight
- Tough

TOUGH CRUTCH®

Research has shown that the key failure point on lightweight garments is in the crutch area. With this in mind, we have reinforced our lightweight trousers and rainwear with the Tough Crutch®. The diamond shaped insert we’ve added here, coupled with the strength of our special high tensile thread, give you the confidence and comfort you would expect from performance workwear.

- Strong Seams
- Rip and Tear Resistant
- Lightweight
- Tough

This Stratatek fabric is constructed from 3 layers. The 1st layer is an extremely tough 100% Stratatek 600D textile. The 2nd layer is a breathable waterproof PU membrane which is applied to the Polyester afterwards, using advanced technology. The 3rd layer is a tough tricot knit-back on the inside to prevent damage to the membrane. Water column: H20:25,000mm. Breathability: 4,000g/m²/24H.

- Waterproof
- Tough

When a flame comes into contact with Arc Rated Inheratex® blends, tiny amounts of inert, non-burning gasses push the oxygen away from the surface to stop the burning process. As soon as the flashover stops a charred barrier remains which means: No melting / No dripping / No material sticking to the skin. The charring action and protection of the fabric gives the wearer life insuring time to react appropriately.

- Flame Retardant
- Arc Protected

SystemSeal is used on the Extreme garments, to seal up all seams and stitching – the most common area for Rainwear to leak. This means that a very strong and flexible 3 layer seam-seal tape is welded throughout the interior of the garment to seal the seams and stitching. SystemSeal has been developed over the past 6 years, with quality and functionality.

- Waterproof
- Strong Seams

Greater front and back differentiation using the UltraFlect® tape, refer to pg 45 for more detail.

- Reflective
- High Visibility
-

SafeFlex™ is a Kevlar composite anti-penetration mid-sole, during testing, achieved superior results over conventional steel, because it can be directly stitched to the upper, protecting the entire sole area. It is also lighter and more flexible than steel.

- Anti-Penetration

Moist Dispel™ lining has been developed for utmost dryness and breathability. Specially designed to wick moisture away from your feet all day and allowing them to breathe, optimally keeping them dry and aerated.

- Moisture Wicking
- Breathable

ARGYLE SAFETY SYMBOL INDEX

These helpful Safety Symbols our team have designed will help you choose the right garment for you and your team. Every one of our garments are tested and certified by an independent testing laboratory to all the latest safety standards, so you can ensure you stay safe by being compliant to the latest standards. In order to keep design consistency throughout our catalogue some of our safety icons may vary from international standards icons.

Garment tested & certified to Temporary Traffic Management Control - Wet (TTMC-W17) code of practice as per CoPTTM section B3.

Design tested & certified to: AS/NZS 4602:1:2011 + Amdt No.1:Nov 2016 Class D. Suitable for Day use only.

Fabric tested & certified to: AS/NZS 1906.4:2010.

Fabric complies to AS/NZS 4399. UPF rating of 50+ Excellent Protection.

Electrical Arc flash protection - exceeds the 8 CAL/cm² arc rating requirements for HRC 2. Fabric tested according to the standard ASTM F1959/ F1959M-12, Determination of the Arc rating (ATPV or EBT50) of flame resistant material clothing.

Fabric tested & certified to: EN ISO 14116. Protective clothing - Protection against heat and flame-limited flame spread materials, material assemblies and clothing.

Fabric tested & certified to: EN ISO 11611. Protective clothing for welding and allied processes.

Meets IS3/IAS3 New Zealand Food Industry Guidelines.

Design tested & certified to: AS/NZS 4602:1:2011 + Amdt No.1:Nov 2016 Class D/N. Suitable for Day/ Night time use.

Flame-resistant clothing for protection of industrial personnel against short-duration thermal exposures from fire.

Retro-Reflective Tape tested & certified to AS/NZS1906.4:2010.

Waterproof material exceeds: EN343 Protective clothing- Protection against rain.

Fabric tested & certified to: EN ISO 11612 Protective clothing - Clothing to protect against heat and flame.

Garment exceeds: EN1149:2008 antistatic properties for protective clothing.

Fabric has a high tear resistance and abrasion resistance.

Tested and certified by independent testing laboratory.

Complies with our Registered Design # 409311.

Manufactured to AS/NZS 2210.3:2009.

SBP anti-penetration SafeFlex™ midsole.

SB SRC - slip resistant soles exceed in both slip resistance tests in EN ISO20345:2011.

Antistatic rated exceeds EN ISO20344:2011.

Heat Resistant Sole capable of withstanding temperatures not exceeding 150°.

Heat Resistant sole capable of withstanding temperatures not exceeding 300°.

Water resistant upper (WR).

Energy absorption of Seat (heel) Region (E).

Category SB - Basic requirements of safety footwear

Manufactured to EN ISO 20345:2011.

Tested to AS/NZS 2210.3:2009 SRB Slip resistant rating (Stainless steel with glycerine).

New Zealand grown and crafted leather.

SRA - slip resistant soles exceeds EN ISO20345:2011.

Oil and acid resistant sole.

EN ISO 17249:2013/AC 2014 Class 2.

Cut resistant (CR).

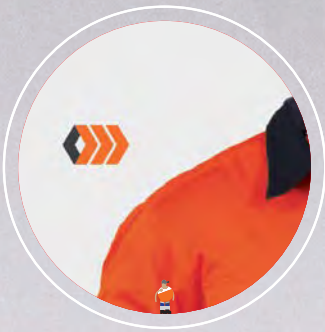

Wide fitting footwear.

Category S1 = SB + Close Seat Region, Antistatic properties and energy absorption of Seat (heel) Region.

ARGYLE WORKZONE SYSTEM

The Argyle Workzone System is a new way finding system which has been designed to offer you an easy solution to your workwear needs. Whether you are in a high risk workplace, need compliant workwear or are looking for comfortable, quality, everyday workwear, we have the solution for you. To find out what zone you fit into follow the easy steps below:

STEP 2

Search for the associated Argyle Zone symbols when selecting your garment in our range.

STEP 1

Identify which question best fits your workwear requirements.

ZONE THREE

3

DANGER ZONE

HIGH RISK PROTECTION

Engineered for safety in close proximity of fire, combustion and flash-over risks and hazards.

ZONE TWO

2

EXTREME ZONE

SAFETY IN EXTREMES

Combining high visibility assurance with protection and comfort in extreme conditions.

ZONE ONE

1

PERFORMANCE ZONE

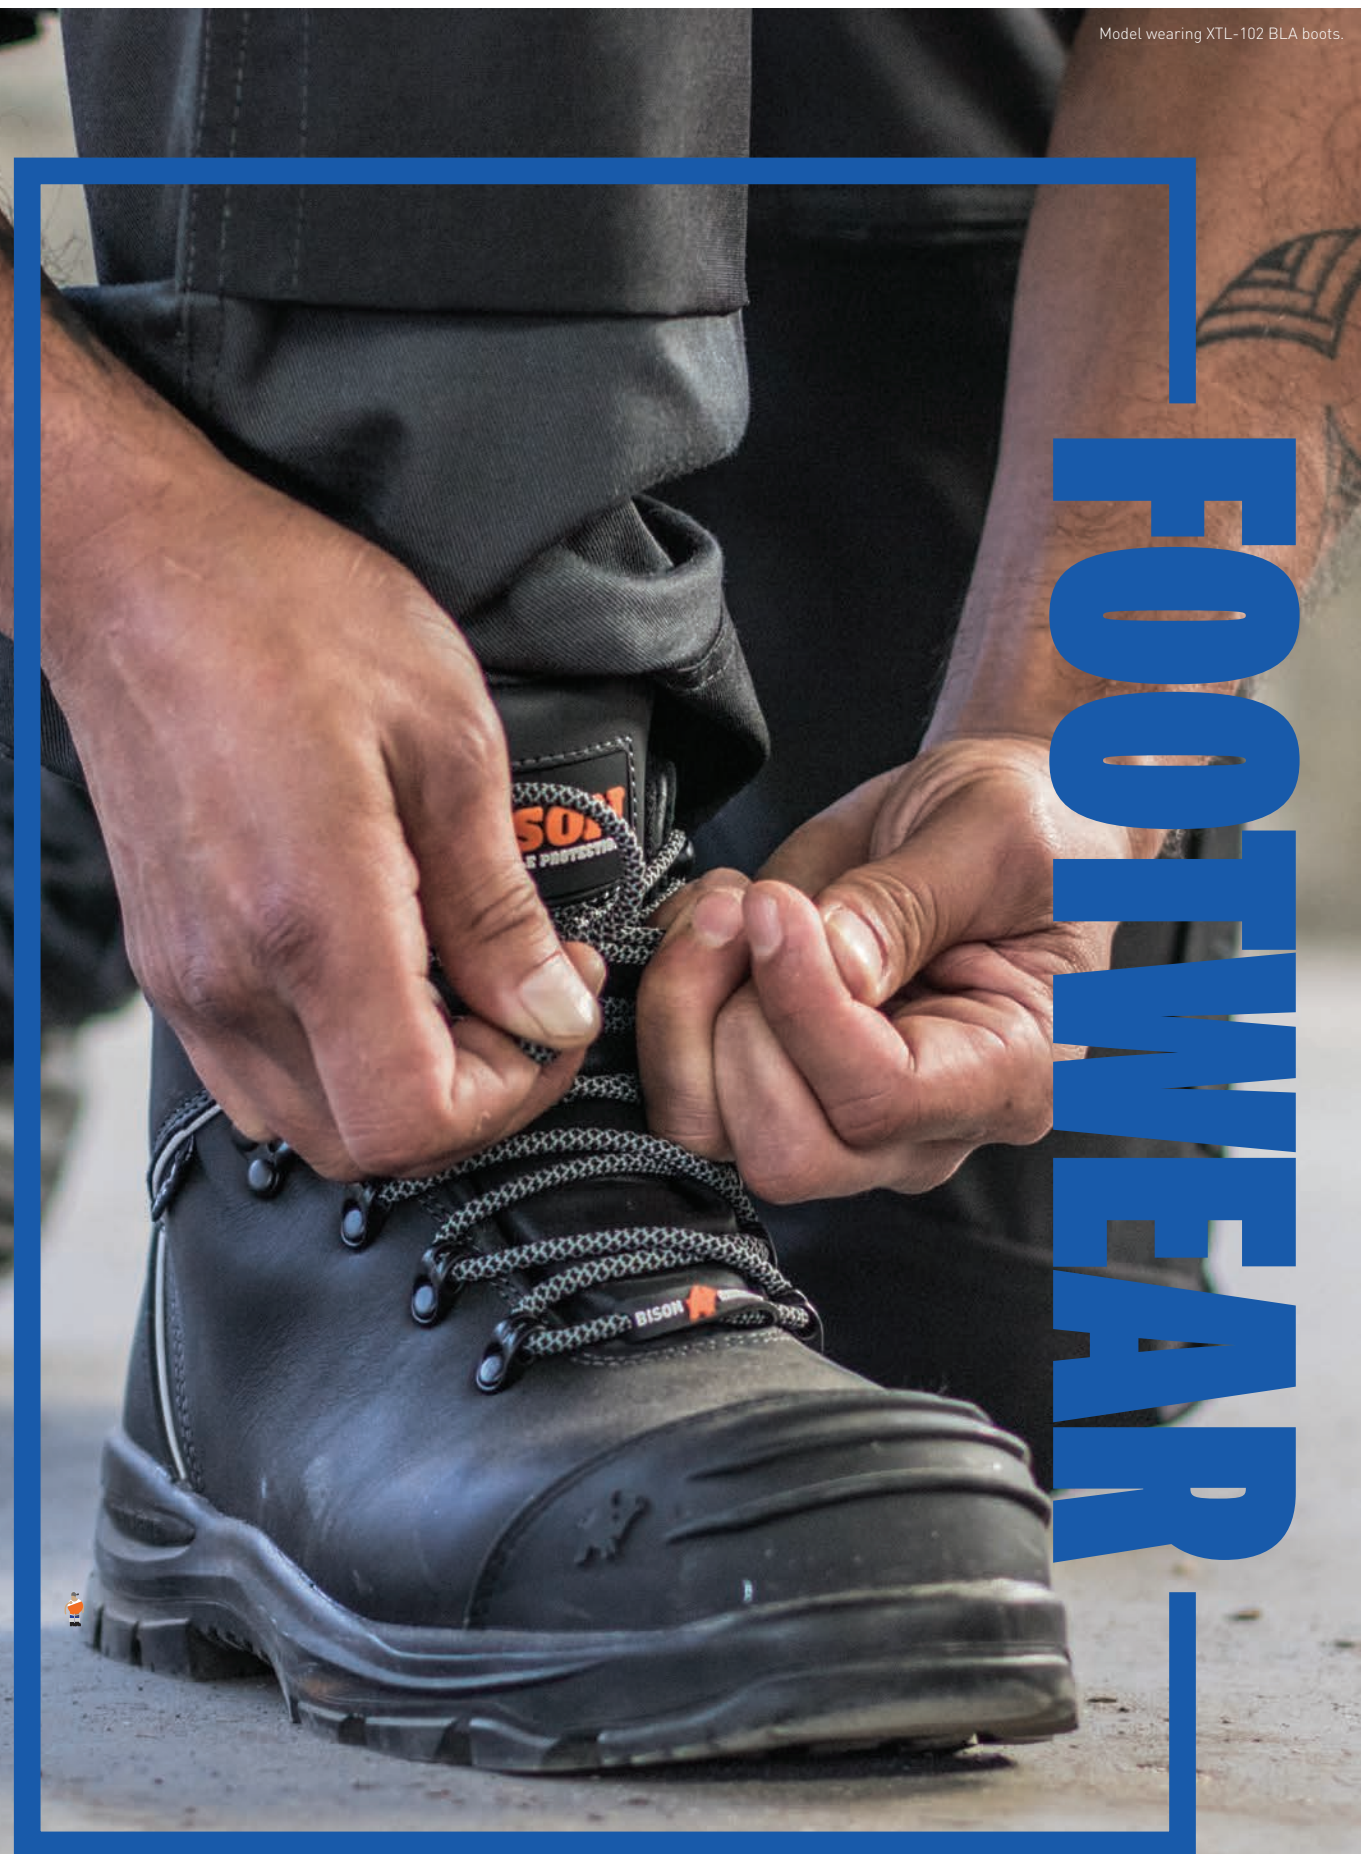

PEAK PERFORMANCE

Agility, comfort, durability and style; fit for purpose and champions.

OUR SUCCESS IS MEASURED IN FEET

FOOTWEAR COLLECTION

We understand that everyone requires different safety features. We understand that comfort and protection is paramount and you want durability that exceeds expectations. Our footwear is at the forefront of the safety industry, not just because of all of our safety features, but because it draws a line between those who have our footwear and those who don't.

GO
XTRA
WIDE

DO YOU FIND IT HARD TO FIND THE RIGHT FIT FOR YOUR FEET?

It's a common problem when your feet don't conform to a standard width. Often the only solution is to wear boots 1 or 2 sizes too large to accommodate wider feet. However, this creates a range of health and safety issues. An oversized boot is potential trip hazard which may lead to injury or worse. We believe your work boots should work for you. That's why we've developed a range of wider fitting Bison XT boots to ensure your work days remain extra comfortable, extra productive and above all safe.

BISON XT ZIP LACE UP SAFETY BOOT

Code XTZ-100 / **Colour** Black / **Standard Sizes:** 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 & 14 / **Extra Wide Last Sizes:** 8W, 9W, 10W, 11W

Wide and Extra-wide fit options minimise excess toe space trip hazard and eliminate rub-zones / **1. Spacious toe cap for greater toe protection** / NZ Tasman Pro-Tec water resistant leather upper / Foot-bed cushioning and ventilation / Seamless heel inner and forefoot breadth / **2. Ergonomics - rocker bottom** sole design aids forward motion and reduces wearer fatigue / Athletic arch and molded heel support / Superior compression and abrasion resistance / **3. Bison Grip nitrile rubber sole with multi-directional tread pattern reduces slips** / Nitrile rubber outsole offers extreme protection up to 300°C / Tough laces - toughest 5mm Nylon DTY laces used so they'll last as long as your boots.

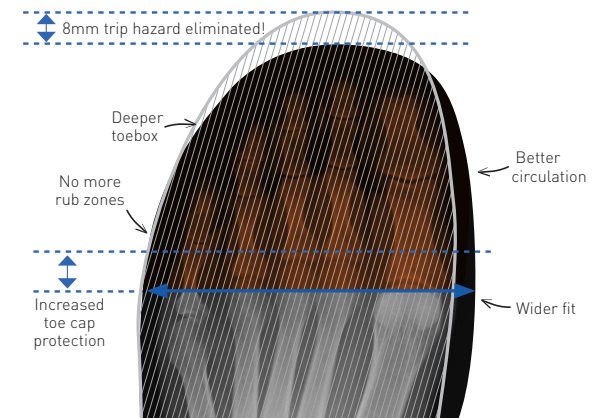

EXTRA-WIDE

FIT

FOR THE BROAD FOOT

We created a comfortable, broad last shape to enable wearers with broader feet to reduce their standard boot size (length), eliminating the permanent 8mm toe trip hazard for each size reduction. This also means greater comfort, with a lighter boot and increased toe cap protection.

DELIVERS MAXIMUM

GRIP

ON ALL SURFACES

We formulated a Bison Grip nitrile rubber sole, with a multi-directional tread pattern, that is more grippy than any other boot we tested in both wet and dry conditions. Plus we added a rocker heel and toe, and a forward pitch, reducing heel strike slip risk, and further reducing wearer fatigue.

ENHANCED LONG-TERM WEARER

COMFORT

CUSHIONING

We've added a state of the art footbed with athletic arch support, compression resilient cushioning and an innovative use of channels and holes to enhance air circulation around the foot.

NEW
ARRIVAL

BISON XT SAFETY BOOT

Ankle Zip Lace Up

Code: XTLZ-101 / **Colour** Wheat
Standard Sizes: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 & 14
Extra Wide Last Sizes: 8W, 9W, 10W, 11W

Wide and Extra-wide fit options minimise excess toe space trip hazard and eliminate rub-zones / Water resistant leather upper / Foot-bed cushioning and ventilation / Ergonomics - rocker bottom sole design aids forward motion and reduces wearer fatigue / Athletic arch and molded heel support / Bison Grip nitrile rubber sole with multi-directional tread pattern helps reduces slips.

BISON WOLF SAFETY BOOT

Lace Up

Code BISON11SBP / **Colour** Black / **Sizes** 5-12

Standard SBP with anti-penetration midsole, complies to ISO 20345:2004 International Safety Standards, AS/NZS 2210.3 Standard S1P and SRB rated for slip resistance / TPU ankle and heel support and steel toe cap / Downward facing seams for increased water resistance / PU/TPU outsole providing high abrasion.

BISON DUTY SAFETY BOOT

Lace Up

Code BISON01 / **Colour** Black / **Sizes** 5-6, 6½, 7-12

Complies to ISO20345:2011 S1 SRC International Safety Standards / Ladder grip for safe footing up ladders / Additional comfort with the low density PU midsole / Extra soft, dual density PU sole / Extremely lightweight with all the safety features / Shock absorber for heel invigoration / Steel toe cap / AS/NZS 2210.3:2009.

BISON XT SAFETY BOOT

Ankle Lace Up

Code: XTL-102 / **Colour** Black
Standard Sizes: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13 & 14
Extra Wide Last Sizes: 8W, 9W, 10W, 11W

Wide and Extra-wide fit options minimise excess toe space trip hazard and eliminate rub-zones / Tasman Pro-Tec water resistant leather upper / Foot-bed cushioning and ventilation / Ergonomics - rocker bottom sole design aids forward motion and reduces wearer fatigue / Athletic arch and molded heel support / Bison Grip nitrile rubber sole with multi-directional tread pattern helps reduces slips.

REDBACK ALPINE SAFETY BOOT

Lace Up with Scuff Cap

Code USAOKS / **Colour** Brown / **Sizes** 4-6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½ & 12-15

Complies to ISO20345:2004 S1 and AS/NZS 2210.3:2009 Class 1 SRB / Scuff Cap for toe protection / **Premium full grain leather made in New Zealand** / Acid, oil and slip resistant hardwearing soles / Wide fitting with steel toe cap.

REDBACK ALPINE SAFETY BOOT

Lace Up

Code USAOK / **Colour** Brown / **Sizes** 2-6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½ & 12-15

Complies to ISO20345:2004 S1 and AS/NZS 2210.3:2009 Class 1 SRB / **Premium full grain leather made in New Zealand** / Acid, oil and slip resistant hardwearing soles / Soft low density PU midsole for comfort and shock absorption / Wide fitting with steel toe cap.

WORK BOOT STRENGTH

CASUAL SHOE FIT

BISON XT SAFETY BOOT

Zip Lace Up

What am I best used for?

Pretty much every single job apart from working in the meatworks (unless you work in the chillers). Keeping the NZ economy going - I use NZ leather. Great for tradies - The zip side means I'm easy to get on and off and we put a good zip to make sure it lasts.

What makes me good?

Fit - I am built for New Zealander's and designed by New Zealander's.

Grip - I have the highest slip resistance a boot can get and the design of my sole means I can grip on almost any surface; mud, gravel, clay you name it I love it! I'm built for NZ industries.

Comfort - I have a great fit, and with my soft, self breathing innersole I am also very comfortable.

BISON GRIZZLY SAFETY BOOT

Slip On

Code BISON10SBP / Colour Black / Sizes 5-12

Standard SBP with anti-penetration midsole, complies to ISO 20345:2004 International Safety Standards, AS/NZS 2210.3 Standard S1P and SRB rated for slip resistance / Diamond tread ladder grip to increase stability while climbing / Safe low-profile scuff-cap / Steel toe cap / AS/NZS 2210.3.2009.

BISON TRADE SAFETY BOOT

Slip On

Code BISON00 / Colour Black / Sizes 4-6, 6½, 7-12

Complies to ISO20345:2011 S1 SRC International Safety Standards / Ladder grip for safe footing up ladders / Extra soft, dual density PU sole / Superior traction on all surfaces / Extremely lightweight with all the safety features / Economic option / Shock absorber for heel invigoration / Steel toe cap.

REDBACK NON SAFETY BOOT

Slip On

Code UBOK / Colour Brown / Sizes 2-6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½ & 12-15

Premium full grain leather made in New Zealand / Non Safety boot / Elastic side with ordinary toe / Oiled kip leather / Wide fitting.

REDBACK BOBCAT SAFETY BOOT

Slip On with Scuff Cap

Code USBOKS / Colour Brown / Sizes 4-6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½ & 12-15

Complies to ISO20345:2004 S1 and AS/NZS 2210.3:2009 Class 1 SRB / Scuff Cap for toe protection / Premium full grain leather made in New Zealand / Acid, oil & slip resistant hardwearing soles / Shock absorbing heel plug as well as shock dissipating grooves.

REDBACK BOBCAT SAFETY BOOT

Slip On

Code USBOK / Colour Brown / Sizes 2-6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½ & 12-15

Complies to ISO20345:2004 S1 and AS/NZS 2210.3:2009 Class 1 SRB / Premium full grain leather made in New Zealand / Acid, oil and slip resistant hardwearing soles / Shock absorbing heel plug as well as shock dissipating grooves / Wide fitting with steel toe cap.

BISON MOHAWK SAFETY GUMBOOT

PVC/Nitrile Food Industry

Code MOHAWKGSX / Colour White/Grey in sizes 4-13
Colours White/Green and White/Yellow in sizes 5-13

Heavy duty PVC upper with PVC sole / Anti-bacterial PU innersole / Kick off spur on heel for easy removal / Sole resistant to solvents, oil, acid, alkalis and fats / Reinforced ankle, heel and instep for optimum support / Steel toe cap / Wider last with antibacterial comfort inner / Superior slip resistant sole / Self-cleaning sole / Sole cleat pattern designed for maximum traction in all conditions / Over 20% lighter than other gumboots.

BISON INCA SAFETY PVC GUMBOOT

Code INCAGS / Colour Black/Grey / Sizes 4-13

1. Flexible composition - millions of microscopic air bubbles help make the Inca resistant to cracking / Self-cleaning cleat pattern / Wide European last / Arch support for increased comfort / Resistant to animal fats, oil and acids / **2. Cut-off rings to shorten** / Ezi Exit spur for quick removal / Rigid upper will not drape whilst remaining flexible / **3. Cleat pattern design for maximum traction** / Supple hard-wearing PVC with high stress areas protected by double thickness PVC / Steel toe cap.

Kit Your Crew

Look good - stay cool - stay compliant!

Looking like the day's going to be a scorcher? To keep you cool in insanely hot conditions we have developed our lightweight Ripstop gear.

Don't be fooled by the long sleeves on the shirts, these actually work to keep your temperature down!

Wearing a long-sleeved shirt in light weight fabric will keep the body cooler than having your skin exposed with short sleeves - even in the hottest climates. We have used a similar fabric in our lightweight gear to that used by traditional desert dwellers and have strengthened it with a Ripstop component to make sure you get the best of both benefits. You'll be staying cooler so you can work longer with less fatigue and less dehydration.

Don't sweat the small stuff! Our VentYou™ back and underarm ventilation is built into your shirt. VentYou™ ventilation increases the airflow around your body keeping the sweatiness to a minimum and the coolness to a maximum. Thumbs up to that my friends!

Brush that dirt off your collar... or at least make it hard to see with your shirt's contrast collar and sleeve cuffs – the darker fabric helps reduce visible grime. Same goes for the contrast fabric on your pants, yourself and the team will be looking sharper for longer.

Keep the tools of your trade on you, your Ripstop pants have a ruler

pocket, pen pocket and tool loops. You'll be able to store more devices on you thanks to the two zipped chest pockets, they'll fit your smartphone and even the iPad Mini.

There's a leg and cargo pocket with heavy duty vislon zips too, another great place to store your phone if you've populated the chest pockets already. Once you've filled your pants (with tools) you might need a belt, just loop it through the heavy duty belt loops.

No more tears from ripping your gears - our Ripstop fabric has you covered. The 'cube weave' technology means our Ripstop fabric is 150% more abrasion, tear warp and tear weft resistance than a standard lightweight cotton twill.

“Wearing a long sleeved shirt in light weight fabric will keep the body cooler”

The Endura™ reinforced knee protector pockets mean you can worry less about blowing out your knees and more about the task at hand. Endura™ is an extremely tough and durable textile originally chosen for our Craftsman pants. It performed so well we've put it into the lightweight Ripstop pants as well! This means maximum durability and exceptional resistance to abrasion, tears, scuffs and punctures.

GREATER PROTECTION FROM FRONT TO BACK

Having two strips of **UltraFlect®** reflective tape on the arms means you're more visible. AS/NZS 4602.1:2011 APPENDIX B – USE OF RETRO-REFLECTIVE STRIPS ON SLEEVES AND LEGS OF GARMENTS, states that "Recent research has shown that where a high visibility garment has sleeves or legs, or both, significant visual benefits can be obtained by adopting an optimum biomotion configuration of retro-reflective strips on the sleeves and legs." Point (a) states "A 50mm wide hoop of material around each sleeve just above the elbow and around each wrist." This entails, placing two retro-reflective strips of **UltraFlect®** tape on the arms.

RAPID REFLECTIVE RECOGNITION

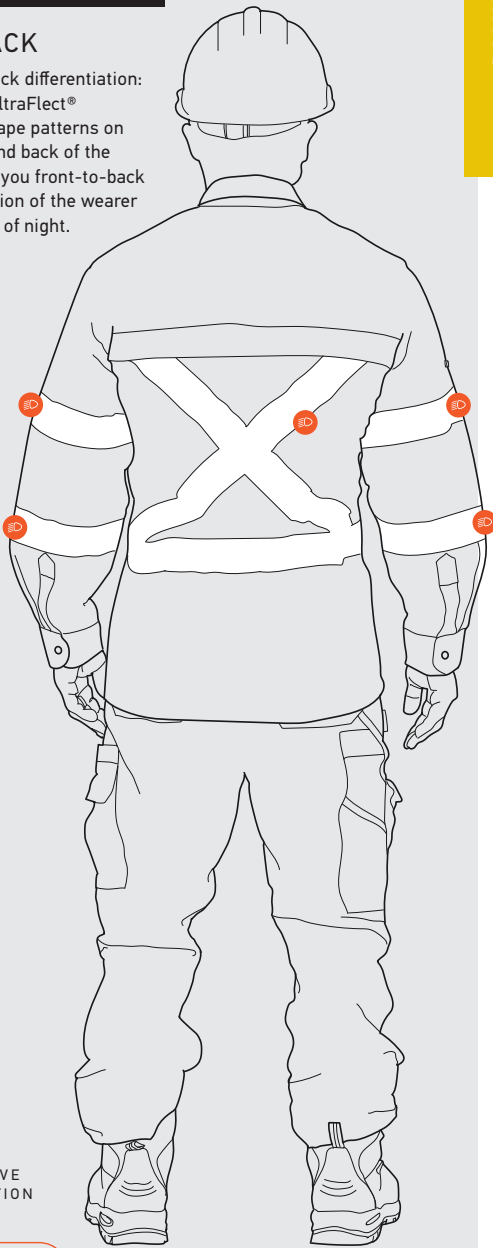

"STRIPED" FRONT

Complies to Appendix B: Two strips of tape on the arms means you comply with AS/NZS 4602.1:2011

"X" BACK

Front to back differentiation: Different UltraFlect® reflective tape patterns on the front and back of the shirt gives you front-to-back differentiation of the wearer in the dark of night.

REFLECTIVE TAPE FEATURE

VIEW OF WEARER BACK

VIEW OF WEARER FRONT

Model wearing SNBCORS LW YBL shirt, TNBCOLWRS YBL trousers and XTL-102 boots.

ARGYLE LIGHTWEIGHT DAY/NIGHT 150GSM 100% RIPSTOP COTTON SHIRT

PRACTISING SAFETY IN THE HEAT

A GUIDE TO RECOGNISE AND DEAL WITH HEAT RELATED ILLNESS

KNOW THE SIGNS

Recognize the warning signs and symptoms of heat related illness: headache, dizziness, fainting, weakness, wet skin, irritability, confusion, thirst, nausea, vomiting.

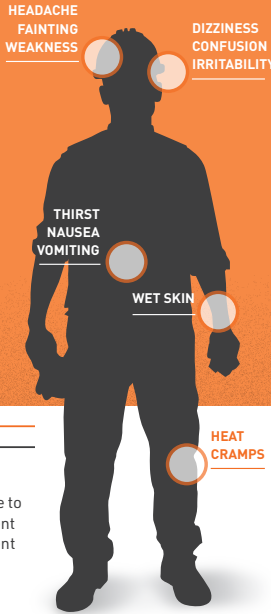

STAY HYDRATED

Drink water every 15 minutes - don't wait until you're thirsty. Don't drink liquids that contain alcohol or large amounts of sugar - these actually cause you to dehydrate. Alternate water with sport drinks to help replace electrolytes.

STAY COOL

Give your body time to slowly acclimate to the weather. Schedule frequent rest periods in cool, shaded areas. Limit sun exposure and time in high temperatures. Wear loose, lightweight clothing and a wide-brimmed hat.

A GUIDE TO SPOTTING THE SYMPTOMS OF HEAT RELATED ILLNESS

HEAT EXHAUSTION

This can develop after several days of exposure to high temperatures and inadequate fluid intake.

HEAT CRAMPS

Muscle spasms in the abdomen, arms or legs.

HEAT STROKE

A condition that occurs when the body is unable to regulate its temperature. It can cause permanent disability and even death if emergency treatment is not provided. A worker suffering from Heat Stroke may become confused, unable to think clearly, pass out, collapse or have seizures.

THE RISK FACTORS

Waterproof clothing can cause overheating.

Poor physical condition or health problems.

Too much alcohol or caffeine. Lack of sleep or eating disorders.

STEPS TO TAKE

HOW TO REACT IF A WORKMATE BECOMES OVERHEATED

Call a supervisor or co-worker. If they're not available call 111.

Move them to a cool shaded area.

Fan and mist the worker to cool them down. Stay with them until help arrives.

ARGYLE BREATHABLE TTMC-W17 POLO
Quick-Dri Cotton Backed Hi Vis

Code V14TTMC / **Colour** Orange with Navy trim
Sizes S-3XL, 5XL & 8XL

(FROM LEFT TO RIGHT)

THE ESSENTIALS

↑
Bison XT Boots
* Sturdy
* Wide Fit
* Grippy as
* Makes calf muscles look sexy.

↑
SCBPC Craftsman Shorts
* Carry everything you see on the next page...
EVERYTHING!
(Fried eggs in pockets may cause undesirable results)

↑
PNOCBLW Shirt
* Breathes in. Breathes out.
* Ventilation to control that body odour!
* Cool chest pocket so you can put your device in and zip that baby up!

↑
Hard Hat
* NOT for headspins.

↑ ↑
When the boss walks past pretend you're hard at it by:
* Swinging hammer
* Squeezing pliers

↑
Steak knife and fork
* Also an absolute necessity in the toolbox.

↑ ↑ ↑
Juicy Steak | Runny Eggs | Chips
When you need to refuel from a long day of hammer swinging and plier squeezing!

Kit Your Crew

Get it all - Lightweight - Ventilation - Storage - Visibility.

Working on our roads is no walk in the park, especially when the sun is beating down and the heat is on.

If your crew are draped in heavy, suffocating overalls not only is their range of movement restricted, but they will be absorbing energy-sapping heat that is likely to decrease work performance levels.

Don't you have enough on your plate than to worry about poor work performance and complaints about underperforming work attire?

If you haven't already, get your crew into these Argyle Lightweight TTMC-W17 Overalls.

At only 210gsm, the lightweight fabric makes these the heavyweight champion of overalls for the roading industry! To give you an idea, this fabric is usually only used for shirts.

These babies breathe as well! The ventilation system ensures you stay cooler than a box of brews fresh out of the fridge giving you the energy to actually conquer the heat and increase your performance and endurance working under the sun. Sufficient ventilation will also decrease body odour so that you don't go home after a long hot day only to cop flack from the family for smelling like a bag of onions.

Important calls and messages from family (and the boss) cannot afford to be missed. Don't leave your mobile device in your bag on the truck that is parked 3km away because your current overalls are lacking secure storage space. Our overalls are equipped with a safe and secure internal cellphone pocket

eliminating any risk of dropping your device so that you can reply 'Sure thing dear' as soon as the wife/husband sends you the shopping list to tick off after a long hot 12 hour shift.

Ok... let's be real for a minute.

Unfortunately, many of our road users are blind as bats or simply careless. The environment also doesn't help when it decides to dim the lights bringing poor visibility. So making sure that you are seen can actually be the difference between whether or not you go home to your family at the end of your shift! Sounds 'dark' and gloomy I know, but as I mentioned before... let's be real.

The double bands of reflective tape on the arms and legs of these overalls help to increase your chances of being seen before it's TOO LATE!

“The ventilation system ensures you stay cooler than a box of brews fresh out of the fridge”

Working on our roads can be highly dangerous and the last thing you need is under performing overalls that will only increase the risks through heat fatigue, poor visibility and family disputes from getting home smelly or forgetting the milk that was at the top of that shopping list. This isn't another overall designed to protect under clothing.

Lightweight. Ventilation. Storage. Visibility.

We're taking performance, endurance and wearability to a whole new level with the Argyle Lightweight TTMC-W17 overall.

CTPCOLW Overalls - Pg 89 / XTL-102 Safety Boots - Pg 27

THE Quick HI VIS

When working around vehicles or moving machinery it's important to ensure you and your workers/work mates are clearly visible. This guide outlines in very basic visual terms the type of garment needed for different applications based solely on the hi visibility requirements.

NIGHT COMPLIANT

Used by persons after dusk and before dawn (basically during nighttime hours)
Example: Security officers.

DAY COMPLIANT

Used for persons working only between the hours of dawn and dusk (basically during the daylight hours or in controlled lighting environments).
Example: Tradies, Construction, Farming and Warehouse workers.

OVERALL GUIDE

DAY/NIGHT COMPLIANT

Used by persons that work in both daylight and night time conditions. The standard refers to this level of compliance as 'High Risk Applications'.
Example: Tradies and Construction workers that need to work late or start early.

TTMC-W17 COMPLIANT

Used by persons working on roads under the jurisdiction of New Zealand transport Authority (NZTA). Most companies involved in roadworks, road or roadside maintenance or other roadside activities will work to comply with this standard. This is the highest level of hi visibility compliance in New Zealand - It covers all requirements for each of the other 3 standards listed.

Kit Your Crew

It's raining, it's pouring but I'm wearing Argyle Extreme Gear so BRING IT!

No worries if the weather report ain't looking too flash - we believe in working hard no matter the weather.

Take the day by storm in the Extreme Rainwear! The choice for crews who are out in the weather all shift, who need to be seen and stay dry in tough conditions.

We know that working on cold mornings, in the dark, in heavy rain and snow is all part of the job - and we're here to make it easier. To **ENHANCE** your work and to **PROTECT** you from the elements.

No need to take a rain check on crap days, the Extreme Rainwear's Stratatek fabric with it's 3 layer technology will protect you for 12 hours in the rain. Layer 1: Super strong 100% Stratatek 600D Textile, Layer 2: Breathable Waterproof Membrane, Layer 3: Tough Knit back to protect the waterproof layer.

Systemseal Technology stops any sneaky leaks coming in through the seams and stitching, the most common part of rainwear to leak. Your shoulder is also one piece so no extra seams there to provide opportunities for water to get in. Easily adjust your Velcro Neoprene storm cuffs - make them fit snug around your wrists to stop any drips travelling up your sleeve.

If the rain manages to get past your zip's double storm flaps you'll learn that gutters aren't just for roads, your zip has one too, keep that water channelling in the right direction and not into your jacket.

The weather can't decide what it's doing? Your Extreme jacket has a zip off foldaway hood so you can air out that noggin during dry spells.

Need to keep your phone on you? You've got a stealth mode pocket with a storm flap to keep it hidden, safe and dry.

If the day is particularly chilly there's a warm Sherpa lining in your jacket but if, once again, the weather can't decide what it's doing just zip it out to cool things down.

"To ENHANCE your work and to PROTECT you from the elements"

Ate all your lunch at morning smoko? No problems mate, the Argyle Extreme Raintrousers have adjustable waist tabs to give the belly a little slack! Need to buy another feed later on? Your rear and cargo pockets have storm flaps so your wallet will stay nice and dry. Oh and there's pockets for your tools too!

Visibility isn't too great? Good thing your gear has UltraFlect reflective tape to keep you safe. There's even a double band of tape on your Extreme Raintrousers for extra visibility... just isn't ideal if you're trying to hide from the boss.

And the best part, take off your Argyle Extreme gear after a long day in the rain and you'll still be dry - winning!

47HLTTMC-W Jacket - Pg 115 / TNSPO Raintrouser - Pg 135 / XTZ-100 Safety Boot - Pg 23

DESIGNED TO LET YOU FOCUS ON THE JOB

Argyle partners with latest technologies to deliver the industry's most innovative and highest performance waterproof, windproof and breathable weather protection.

Argyle Extreme has one of the highest water proof ratings in the market. The **25,000mm waterproof rating** means that it's going to take 25 metres of water pressure before the Extreme fabric lets water through! That's one serious downpour! 🌧️

**STAY DRY FOR 12HRS IN OUR
EXTREME & ARC RATED RAINWEAR!**

Tested to 25,000mm water-resistant rating (water column: mm H2O:25,000mm) and Breathability: 4,000g/m2/24H.

**STAY DRY FOR 6HRS IN OUR
STAMINA & RIGOUR RAINWEAR!**

Model wearing JTNP0D ORAJacket, TRBPCLW CHA trousers and XTZ-100 boots.

ARGYLE STAMINA TTMC-W17 DUCK DOWN PUFFER JACKET

Code JTNP0D / Colour Orange / Sizes XXS-4XL, 6XL & 8XL

220gsm genuine duck down padding - top quality, lightweight and comfortable padding / **1. Adjustable velcro sleeves** so they stay in place and for wearer comfort / Zip waist pockets to keep your goodies safe / **2. Long tail design for extra visibility** and to prevent exposure of lower back when bending / Outer shell only is water/wind resistant / Nylon coil zips with reflective trim / Pen partitions on sleeve / **3. Zip off and adjustable padded hood** to keep your head and ears warm / Premium UltraFlect tape for best performance.

Vest with sleeves & reversed

Vest sleeveless & reversed

ARGYLE STAMINA DAY/NIGHT COMBO

Premium Weight 5-in-1 Jacket and Vest

Code JNP5N1SWR / **Colours** Orange/Navy & Yellow/Navy
Sizes S-4XL, 6XL & 8XL

Stamina Main Jacket: Concealed/detachable hood / Double storm flap and rain gutter / Premium #8 zips / Hidden smartphone pocket / Two pockets with handwarmers / Storm cuffs.

Stamina Vest with zip off sleeves (use as vest or jacket): Premium heavy duty zippers / Knit storm cuffs / Black anti-pill polyfleece liner / Zips inside outer jacket. **Water column:** mm H20:16,000mm / **Breathability:** 4,000g/m2/24H.

ARGYLE STAMINA JACKET

TTMC-W17 and Day/Night Polar Fleece Lined

Code 46NPLJKT / **Colours** Orange (TTMC-W17) & Yellow (Day/Night) / **Sizes** S-4XL, 6XL & 8XL

210D Oxford Polyester shell with PU backing / Superior seam sealing and one piece shoulder / Orange jacket only complies with TTMC-W17 / **Water column:** mm H20:5,000mm / **Breathability:** 3,000g/m2/24H.

ARGYLE STAMINA DAY/NIGHT JACKET

Premium Weight

Code 46NJKT / **Colours** Orange/Navy & Yellow/Navy in sizes S-4XL, 6XL & 8XL / **Colour** Yellow/Black in sizes XS-4XL, 6XL & 8XL

Improved double storm flap and rain gutter / Detachable hood, mesh lining and Storm cuffs / **Water column:** mm H20:16,000mm / **Breathability:** 4,000g/m2/24H.

ARGYLE EXTREME JACKET

Day/Night Sherpa Lined

Code 47HLJKT / **Colour** Yellow/Black / **Sizes** S-4XL, 6XL & 8XL

Detachable hood with peripheral vision adjuster / Sherpa zip-out removable lining / Specially designed rain gutter / Two-way YKK centre zip / **Water column:** mm H20:25,000mm / **Breathability:** 4,000g/m2/24H.

STRATATEK™ SYSTEM SEAL

ARGYLE STAMINA DAY/NIGHT JACKET
Softshell Windproof

Code JNPSS / **Colour** Yellow/Navy / **Sizes** XS-4XL, 6XL & 8XL

Unique 3 layer fabric construction - 100% Polyester twill outer, TPU windproof membrane, micro fleece inner for warmth and comfort / 2-way #8 Vislon heavy duty zip / Concealed/detachable hood, fleece lined / Hidden zip smartphone pocket / **Breathability: 3,000g/m2/24H.**

ARGYLE RIGOUR FR VEST
TTMC-W17 and Day/Night

Code V47RVEST / **Colours** Orange (TTMC-W17) in sizes XS-4XL & 6XL & Yellow (Day/Night) in sizes S-4XL & 6XL

Chest smartphone pocket, premium zips / Fire retardant polyfleece liner / Radio pocket with external access for handpiece / Anti-static carbon grid material / **Water column: mm H20:16,000mm** / **Breathability: 4,000g/m2/24H.**

ARGYLE STAMINA DAY/NIGHT VEST
Premium Weight

Code V17 / **Colours** Orange/Navy, Yellow/Navy
Sizes XS-4XL, 6XL & 8XL

Wider shoulder for added protection / Chest smartphone pocket, detachable ID card holder / **Water column: mm H20:16,000mm** / **Breathability: 4,000g/m2/24H.**

ARGYLE STAMINA DAY/NIGHT LINED VEST
with Zip-off Sleeves and Hood

Code VNPPOWR / **Colours** Navy/Yellow (V2NIFY) & Navy/Orange (V2NFO) / **Sizes** S-4XL & 6XL

Black anti-pill polyfleece liner / Neoprene/Velcro storm cuffs for comfort / Removable hood / **Water column: mm H20:16,000mm** / **Breathability: 4,000g/m2/24H.**

ARGYLE PVC PARKA
Premium Weight

Code 2TPARKA / **Colours** Yellow & Green / **Sizes** S-6XL

Vented back and under arms / Storm protection with tie hood, elastic storm cuffs / Zip front and domed storm flap / 0.45mm Premium weight 480gsm PVC.

Model wearing V18VEST ORA vest and 46LTROU ORA raintrouser.

ARGYLE STAMINA TTMC-W17 VEST
Premium Weight

Code V18VEST / **Colour** Orange / **Sizes** XS-4XL, 6XL & 8XL

Extra storage - two pockets with flaps & handwarmers / Vest zips inside Stamina 46R as an option / Chest smartphone pocket / Premium zippers / Black anti-pill polyfleece liner / Wider shoulder for added protection / Stay drier - longer thigh length / **Water column: mm H20:16,000mm** / **Breathability: 4,000g/m2/24H.**

ARGYLE EXTREME
Bib Overtrouser

Code BNOPO / Colour Orange/Black / Sizes S-4XL & 6XL

Guaranteed to keep you dry for 12 hours / Knee gussets for increased flexibility and comfort / **1. Front pockets with waterproof zipper** / Rear pockets with storm flaps / Extra wide YKK zipped waterproof leg gusset / Double band of UltraFlect® reflective tape for additional visibility / **2. Adjustable velcro waist tabs** / Extended wear with knee reinforcements / Cargo pocket with storm flap / **3. Angled zipped waist pockets keep your valuables safe** / STRATATEK fabric / SYSTEMSEAL technology / Water column: mm H20:25,000mm / Breathability: 4,000g/m2/24H.

Model wearing BNOPO OBL overtrouser and XTL-102 BLA boots.

ARGYLE FR BIB OVERTROUSER
36 Cal Rated

Code BIPPMAP / **Colour** Orange/Black
Sizes XS-4XL, 6XL & 8XL

36.0cal/cm² ATPV: Arc rating / Unique 3 layer Waterproof, Flame Retardant and Antistatic outer fabric / FR cotton liner / Tough crutch strengthened / Comfort elastic shoulder straps / **Water column: mm H2O:25,000mm / Breathability: 4,000g/m2/24H.**

ARGYLE PVC BIB OVERTROUSER
Premium Weight

Code 2VBIBTROU / **Colours** Yellow & Green / **Sizes** XS-6XL

Elastic shoulder straps / Additional storage with an inside breast pocket / Elastic back for extra comfort / Quality reinforced thigh area / 0.45mm Premium weight 480gsm PVC.

ARGYLE RIGOUR RAINTROUSERS
Fire Retardant /Antistatic

Code 47JTROUWR / **Colours** Orange/Black in sizes XS-4XL, 6XL & 8XL & Yellow/Black in sizes S-4XL, 6XL & 8XL

Anti-static, Fire retardant Raintrouser / Extended wear with knee reinforcements / Totally seam sealed, tough crutch strengthened / **Water column: mm H2O:16,000mm / Breathability: 4,000g/m2/24H .**

ARGYLE RIGOUR FR ANTISTATIC
Bib Overtrouser

Code BIOP0 / **Colour** Orange / **Sizes** S-4XL & 6XL

External chest pocket, tough crutch strengthened / Double band of fire retardant UltraFlect® reflective tape / Antistatic carbon grid / **Water column: mm H2O:16,000mm / Breathability: 4,000g/m2/24H.**

ARGYLE STAMINA BIB OVERTROUSER

Kit Your Crew

This is the page of all things awesome - Utilities and Oil & Gas!

Whether you're looking to kit out a 100-man band or a team of five, these garments will not fail to impress!

Our design team even made sure the size range is such that they will fit your largest worker and hopefully your smallest. These garments are great for both your male and your female staff.

We've made them super soft, so you don't get uncomfortable during your hardcore work hours.

They are a single layer of protection offering a minimum of 10 Cal protection with the top and 12cal on the trousers – there is no need to wear a thermal under layer to get to the PPE 2 protection level, the one thin layer already gives you this protection. We have also kept them light to keep you cool.

“These garments are great for both your male and your female staff”

We've thought of a few things when making these. The garments are made from an inherent fabric, so you don't need to keep a tally on the top of your washing machine to keep track of how many times you have washed the garments.

You would be surprised how many garments have FR properties that can be washed out and you are actually meant to track the washing.

There is a good-sized smartphone pocket on the chest with a zip closure to save you having to pay your insurance premiums from needing to replace a smashed smartphone (this is obviously most useful when you're in areas you can actually have your phone on you).

Our team put a tail on the polo which helps save any unwanted exposure when bending over and gives compliance to required standards.

We've put cargo and tool pockets on both legs of the trousers, so you can carry all the tools and essentials you need and still have your hands free.

The boots need to be seen to be believed, we've designed them to make the most of every step you take. They are grippy on almost every conceivable terrain. They've been known to outclimb others in the harshest conditions by some phenomenal margins.

“The FR properties remain for the life of the garment!”

You wont need to worry every morning about trying to squeeze your foot into some boot that's not made specifically for us anymore either, because we've designed them in NZ and made them extra wide.

We're doing what we can to design and build performance workwear specific to the needs of your industry.

INHERATEX FABRIC

The consequence of an arc flash can be fatal, with workers suffering serious injuries and businesses suffering loss. Inheratex fabric is designed to protect you from these risks.

Many industrial workers are at risk of being in a Flash Fire or Flashover situation, some workers are unaware this risk exists. In response, the Argyle fabric was produced for revolutionary flashover protection incorporating the ability to discharge static build-up safely.

IN

CHARACTERISTICS OF THE ARGYLE INHERATEX FABRIC

Inheratex is a synthetic copolymer. Argyle Inheratex offers an uncompromising superior protection from Flash fires, Flame, and static discharge. The fabric is also soft, strong, resilient, and dimensionally stable, made from fibres that can be easily dyed, show good press and shape retention, and are quick to dry. Being quick to dry means there is less risk of heat being transported to the body by moisture. Inheratex fibres have outstanding resistance to chemicals and solvents, are not attacked by moths or mildew, and are non-allergenic.

WHAT REALLY COUNTS

The Inheratex fabrics have the ability to combine flame retardance, arc protection, and static discharge with a relatively low density, meaning protective gear is not uncomfortably heavy. Luxurious to handle, good absorption, quick drying with excellent strength:

- 1

No deterioration in fire retardant performance.
- 2

No unpleasant odours.
- 3

No loss of mechanical properties.
- 4

No chemical treatments or re-treatments.
- 5

The consequence of a Flash Fire can be fatal, with workers suffering serious injuries and businesses suffering loss. Inheratex is designed to protect you from these risks.
- 6

Superior moisture management.
- 7

More environmentally friendly than chemically treated fabrics.
- 8

More comfortable than treated cotton.

FEATURES AND BENEFITS OF THE ARGYLE INHERATEX

The Argyle Inheratex inherent flame retardant properties will not deteriorate or diminish; they are literally a structural part of the fibre. As well as eliminating the need for costly re-treatment and unpleasant odours, this also gives Inheratex the edge in practical comfort.

There is no loss in performance, even after repeated laundering (including industrial), dry or spot-cleaning.

Breathable fabric – the Inheratex blend provides uncompromised breathability.

Because Inheratex fabrics are inherent and no chemical treatments are used for the protection they offer, they are more environmentally friendly than garments using Natural fibres, which require chemical treatments to be able to offer a similar protection.

Good colour fastness for longer life – these fibres have a similar colour retention to a Polycotton garment which is a lot higher than a natural fibre can offer. This means the company image is retained for longer.

PERFORMANCE STANDARDS

Argyle woven Inheratex fabric meets the following performance standards: EN ISO 11611 Class 1, A1, A2 Protective Clothing for use in welding and allied processes. EN ISO 11612:2015 A1, A2, B1, C1, F1 Protective Clothing - Clothing to protect against heat and flame. NFPA 2112 Certified, 12 cal HRC 2. Arc rating as per ASTM F1959.

INHERATEX MOISTURE MANAGEMENT

Moisture is a means of transport for heat which in effect means that if your garment has damp spots or moisture spots you could still be at risk if exposed to a flashover. Argyle Inheratex synthetic fibres are blended with natural fibres, giving these garments fantastic inherent quick drying properties. This significantly reduces the risk for the wearer of being seriously harmed by a flash fire..

STATIC DISCHARGE SYSTEM

Carbon antistatic thread is woven into the fabric to provide a garment protecting against the build-up of static electricity. This thread is woven into a grid pattern, barely visible to the naked eye, and consists of 2% of the fabric makeup. The antistatic properties of the Inheratex garments comply to EN1149-5:2008, internationally recommended for all petroleum industries.

ARGYLE TTMC-W17 FR ARC RATED JACKET
240gsm Inheratex

Code FJPVCMW / Colour Royal/Orange / Sizes S-5XL

Inherent Flame Retardant, Antistatic and Arc Protection rating / Collar designed to stand for increased neck protection / YKK non-conductive zip / More effective shorter shoulder gusset / Cellphone pocket with quick access FR Velcro tab / Arc rating: 12 cal/cm² ATPV HRC2/PPE2.

ARGYLE DAY/NIGHT FR ARC RATED SHIRT
240gsm Inheratex

Code FSPVCMW / Colours Orange/Navy & Yellow/Navy
Sizes S-4XL

Inherent Flame Retardant, Arc Protection, Anti-static / Large plans pocket on chest with velcro closure / External smartphone pocket with velcro closure / Vented back and under arms / Fire Retardant UltraFlect tape / Arc rating: 12 cal/cm² ATPV HRC2/PPE2.

ARGYLE TTMC-W17 FR ARC RATED POLO
250gsm Knitted Inheratex

Code PTBMKLSB / Colour Orange with Navy trim
Sizes S-3XL, 5XL & 8XL

Inherent Flame Retardant, Antistatic and Arc Protection rating / Slimline zipped smartphone pocket on chest / Double band of FR UltraFlect® retro-reflective tape on arms and back / Contrast collar and sleeves helps reduce visible dirt and grime / Long tail for extra visibility prevent exposure of lower back when bending / Super soft lightweight knit Inheratex fabric increasing the workability of the user / Arc rating: 10 cal/cm² ATPV HRC2/PPE2.

ARGYLE ARC RATED FR TROUSER
240gsm Night Vision Inheratex Taped

Code FNPVCMW / **Colour** Navy
Sizes 77, 82, 87, 92, 97, 102, 107, 112, 117 & 122

Inherent Flame Retardant, Antistatic and Arc Protection rating / Elastic waist with belt loops for a comfortable fit / Cargo pockets for storage / Double skin knees for added comfort and longevity / **Arc rating: 12 cal/cm² ATPV HRC2/PPE2.**

ARGYLE ARC RATED FR TROUSER
240gsm Hi Vis Inheratex Taped

Code FTPVCMW / **Colour** Royal/Orange
Sizes 77, 82, 87, 92, 97, 102, 107, 112, 117 & 122

Inherent Flame Retardant, Antistatic and Arc Protection rating / Reflective tape designed to provide ultimate visibility in situations requiring a harness / Hard wearing fabric with double layer knee / Easy insert kneepad / Ruler/tool pocket on leg / Cargo pocket with velcro closure / **Arc rating: 12 cal/cm² ATPV HRC2/PPE2.**

ARGYLE TTMC-W17 FR ARC RATED OVERALL
240gsm Inheratex Zip Closure

Code FEPVCMW / **Colour** Royal/Orange / **Sizes** 4-14 & 16

Inherent Flame Retardant, Antistatic and Arc Protection rating / UltraFlect fire retardant retro-reflective tape / More effective shorter shoulder gusset, allowing greater movement and minimising safety risk of catching / Classy European collar, designed to stand for increased neck protection / Velcro gusset openings on leg for ease of entry and exit of safety boots / Covered elastic to ensure safety of the wearer in arc flash situations / YKK non-conductive two way zip / Cuff adjustment for wearers comfort and enhanced glove fit / Inside breast smartphone pocket / Cargo pocket on left leg and Ruler/tool pocket on right leg / **Arc rating: 12 cal/cm² ATPV HRC2/PPE2.**

Model wearing PTBMKLSB ONA polos and FNPVCMW NAV trousers.

NATURAL FIBRES FABRIC

NF

Dangerous incidents with sparks and arc flash can't always be avoided with some jobs. That's where our specialty fabrics come in. For protection from these risks we created Natural Fibres Fabric.

In the event of a momentary electric arc, flash fire or molten metal splash exposure, non-flame resistant work clothes can ignite and will continue to burn even after the source of ignition has been removed. Untreated natural fabrics will continue to burn until the fabric is totally consumed, while non-flame resistant synthetic fabrics will burn with melting and dripping, causing severe contact burns to the skin.

Government reports note that the majority of severe and fatal burn injuries are due to the individual's clothing igniting and continuing to burn, not by the exposure itself.

Use of Argyle flame resistant clothing provides thermal protection at the area of exposure. The level of protection typically rests in the fabric weight and composition. After the source of the ignition is removed, flame resistant garments will self extinguish, limiting the body burn percentage.

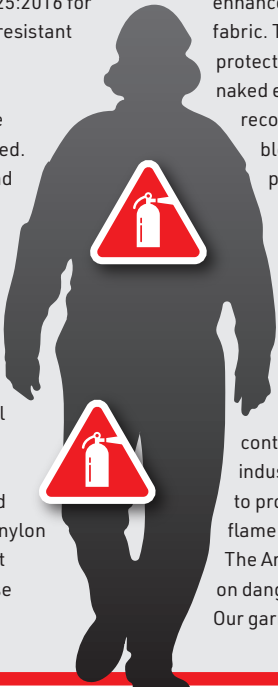

HOW SELF EXTINGUISHING FABRIC WORKS

Flame resistance is the characteristic of a fabric that causes it to self-extinguish when the source of ignition is removed. The most commonly recognised test method is ISO 15025:2016 for limited flame spread. It is very important for flame resistant fabrics to self-extinguish.

Fabrics used by Argyle for the Natural Fibres Range self-extinguish after the source of ignition is removed. This dramatically reduces body burn percentage and increases the chance for survival. However, char length measurements by themselves have no correlation to the protection afforded by a flame resistant fabric.

True protection to thermal events is better measured by testing the thermal resistance of fabrics against exposures to simulated hazards, such as the flash fire manikin test or the arc thermal performance test.

The Argyle natural fibres overalls are manufactured from a 88/11/1 composition - 87.5% cotton, 11.5% nylon and 1% carbon anti-static thread. The fire retardant cotton fibres are focused toward the skin to optimise comfort.

The nylon composition is woven into the fabric to provide enhanced durability, and this is focused toward the face of the fabric. The carbon anti-static thread is woven into the fabric to protect against static electricity. This thread is visible to the naked eye and complies to EN1149-5:2008, internationally recommended for all petroleum industries. Natural fibre blended fabric offers higher abrasion resistance than pure cotton giving increased durability.

We understand that evaluating flame resistant fabric options and launching a protective clothing program can be complicated. As an industry leader in innovation, we're committed to putting a half century of experience to work for you - by providing the facts you need to make an informed decision. Through decades of involvement in industry standards and continuous work with companies in a wide variety of industries, this fire retardant education section is intended to provide an overview of what is important when it comes to flame resistant fabrics and clothing.

The Argyle product range provides comfort and confidence on dangerous oil and gas related job sites around the globe. Our garments are tested to the international standards of

PERFORMANCE STANDARDS

Argyle Natural Fibres fabric complies with the following performance standards: EN ISO 11611:2015 A1, A2 Protective Clothing for use in welding and allied processes. EN ISO 11612:2015 A1, A2, B1, C1, Protective Clothing - Clothing to protect against heat and flame. EN ISO 14116:2015 Index 3 Protective Clothing - Protection against heat and flame - Limited flame spread. 11 cal HRC 2, Arc rating as per ASTM F1959.

STATIC DISCHARGE SYSTEM

Carbon antistatic thread is woven into the fabric to provide a garment protecting against the build-up of static electricity. This thread is woven into a grid pattern, barely visible to the naked eye, and consists of 2% of the fabric makeup. The antistatic properties of the Inheratex garments comply to EN1149-5:2008, internationally recommended for all petroleum industries.

ARGYLE TTMc-W17 FR ARC RATED SHIRT
240gsm Natural Fibres

Code FSBCNLW / **Colour** Royal/Orange / **Sizes** S-5XL

Flame Retardant, Arc Protection, Anti-static / Large plans pocket on chest with velcro closure / Internal smartphone pocket with velcro closure / Velcro cuff adjustments for wearer comfort and enhanced glove fit / **Arc rating: 11 cal/cm² ATPV HRC2/PPE2.**

ARGYLE TTMc-W17 FR ARC RATED OVERALL

LEARN MORE ABOUT

FLAMEGUARD FABRIC

In any work environment that exposes individuals to the risk of flash fires or explosions, something that could potentially prevent a more serious burn injury or help to save a life is necessary. When seconds separate disaster from safety, flame resistant protective clothing just might be the difference that can save a life.

We know that the wide range of flame resistant fabrics can be confusing to the end user confronted with so many different fabrics to choose from, all with their own advantages and disadvantages. We work closely with fibre producers and textile mills in the development and evaluation of new flame resistant fabrics.

Members of our staff have the knowledge and experience to answer your questions about all types of flame resistant protective uniforms. Fire retardant (FR) refers to a material's ability to self-extinguish once an ignition source is removed.

Everyone working in industrial environments that have ignition hazards should wear fire retardant clothing. Even if you haven't had an accident in years, the chances of someone getting seriously burned or worse are still very real. OSH often cites employers who do not provide the proper fire retardant clothing to their employees.

TOP 3 REASONS WHY YOU NEED TO INVEST IN FIRE RETARDANT GARMENTS

1 HELP PREVENT INJURY & DEATH

Recent government reports have noted that the number one cause of severe and fatal burn injuries on the job is an individual's clothing igniting and continuing to burn - not the source of ignition itself. The use of flame resistant clothing helps provide thermal protection at the area of exposure. The level of protection resides in the weight and composition of the flame resistant fabric. Once the source of ignition is removed, fire retardant garments will self-extinguish, allowing precious escape time and limiting the percentage of the body that is burned. Even though a person caught in a flash fire or arc flash will most likely still have some injuries, fire retardant clothing can greatly reduce their severity. And in many cases, it can make the difference between life and death.

2 BECAUSE ACCIDENTS HAPPEN

It's cliché, but it's true. Even when an employee is following the proper safety regulations and the risk is low, accidents can still occur. Fire retardant clothing and personal protective equipment (PPE) are the last line of defence in protecting workers against the unexpected flash fire accidents. Remember, it's not a question of if an accident will occur. It's a question of when.

3 COMPLY WITH REGULATIONS

No matter where your business operates, Worksafe require employers to provide adequate protection from dangerous hazards in the workplace, especially with regard to burn injuries. In fact, companies are often cited and fined by OSH for not providing fire retardant clothing to their employees under 'Occupational Safety and Health Standards: Personal Protective Equipment'. Future changes to the requirements are expected to be even more stringent. There are also many voluntary consensus standards that address the urgency for fire retardant clothing in certain environments and industries. National Fire Protection Association (NFPA®) publish their own guidelines with regard to fire retardant clothing. Not only can complying with these standards satisfy legal requirements and reduce liabilities, it has a tremendous impact on the perception of your company and overall employee morale. When you make a commitment to safety, everyone benefits.

PERFORMANCE STANDARDS

Argyle Flameguard fabric complies with the following performance standards: EN ISO 11612:2015 A1, A2, B1, C1, E1, Protective Clothing - Clothing to protect against heat and flame. EN ISO 14116:2015 Index 3 Protective Clothing - Protection against heat and flame - Limited flame spread. 13 cal HRC 2, Arc rating (Navy/Orange) as per ASTM F1959.

FG

ARGYLE TTMC-W17 FR ARC RATED OVERALL 325gsm Flameguard 100% Cotton Zip Closure

Code CTPCOWFR / Colour Navy/Orange / Sizes 4-14 & 16

FR UltraFlect retro-reflective tape / Hanging trouser pockets and side entry openings / YKK plastic vislon two way zip / Velcro cuff adjustments for comfort and enhanced glove fit / Internal smartphone pocket / Cargo pocket on left leg and Ruler/tool pocket on right leg / Arc rating: 13 cal/cm² ATPV HRC2/PPE2.

ARGYLE DAY/NIGHT FR ARC RATED OVERALL 325gsm Flameguard 100% Cotton Zip Closure

Code FTPCOLT / Colour Navy/Hi Vis Yellow in sizes 5-14 & 16
Colour Navy/Orange in sizes 3-16

FR UltraFlect retro-reflective tape / Internal breast smartphone pocket / YKK plastic vislon two way zip / Two cargo pockets for extra storage / Velcro closure on sleeves / Arc rating: Navy/Hi Vis Yellow is 8.6 cal/cm² and Navy/Orange is 13 cal/cm² ATPV HRC2/PPE2.

ARGYLE DAY ONLY FR ARC RATED OVERALL 325gsm Flameguard 100% Cotton Zip Closure

Code FDPCO / Colour Navy/Orange / Sizes 5-14

Two-way YKK vislon zip / Two deep chest pockets with domed flaps for security / Protected side entry openings to minimize risk of entry of foreign material / Rear hip pocket with flap to minimize risk of entry of foreign material / Covered internal elastic waist with FR fabric / Inside breast smartphone pocket / Twin stitched pockets, seam and waist seam / Internal trouser pockets / Ruler pocket / Arc rating: 13 cal/cm² ATPV HRC2/PPE2.

RIGOUR FABRIC

Argyle Rigour flame resistant high visibility rainwear is constructed with fire retardant treated 300d Oxford Polyester fabric and Carbon antistatic thread woven into the fabric.

This fabric has a heavy duty milky PU backing and all seams are sealed, for superior water proofing. To protect the wearer against static electricity, a carbon antistatic thread is woven into the fabric. This thread is barely visible to the naked eye and complies to EN1149-5:2008, internationally recommended for all petroleum industries.

Fabric designed to give you the protection from the weather that you'll need as a worker in the electrical maintenance, utilities, oil, gas, petrochemical and steel industries. The heavy duty fabric is durable and designed to last, whilst still including all of the necessary safety features these industries demand - a necessary attribute in these heavy industries.

RG

Flame resistant garments should be removed immediately and replaced with clean fire retardant apparel if they become fouled with flammable materials. These garments can be wiped clean using a damp cloth or home laundered in cold water using the gentle cycle. Hang to dry.

STATIC DISCHARGE SYSTEM

Carbon antistatic thread is woven into the fabric to provide a garment protecting against the buildup of static electricity. This thread is woven into a grid pattern, barely visible to the naked eye, and consists of 2% of the fabric makeup. The antistatic properties of the Argyle Rigour garments comply to EN1149-5:2008, internationally recommended for all petroleum industries.

PERFORMANCE STANDARDS

Argyle Rigour outer fabric and lining complies with the following performance standards: EN ISO 14116:2015 Index 3 Protective Clothing - Protection against heat and flame - Limited flame spread.

ARGYLE RIGOUR FR ANTISTATIC JACKET

Removable Fleeeced Lined TTMC-W17 & Day/Night

Kit Your Crew

These garments are built for the butcher, the baker, right through to the candle stick maker.

Did you know that the New Zealand food sector produces enough food to feed more than 20 million people, around five times the population?

Also, the NZ meat industry exports more than one million tonnes of red meat and co-products to over 120 countries around the world? Massive numbers huh??

The global food and beverage industry is growing at around 5% a year and global expenditure on food products by consumers is expected to reach US\$20 trillion by 2030 (that's around NZD\$30.5 trillion). With these numbers in mind our design and supply chain teams are having conniptions. How will they keep up with demand? Don't worry we have narrowed our focus to New Zealand and Australia to ensure we can.

“Some companies have literally got over 5 years of wear from our garments”

We've got some really cool gear for the food sector. These garments are a Lightweight 240gsm fabric and they have all the bells and whistles.

The dustcoat includes a hi vis fabric upper to give a higher level of safety. To make things even better we have got some useful internal pockets, so you can keep your phone, hairnet, beard cover, disposable gloves, wallet, notebook, pens and a whole bunch of other stuff you need to keep handy.

Our design team got fancy and added a ribbed cuff to the sleeves to stop anything that's not meant to, from falling out of your sleeves too. They also stop things going up your sleeve and stop your sleeve getting caught on things.

The pants (affectionately known as boat pants) are a good fit with internal pockets for keeping your goodies in too. We thought an elasticated waist with a tie would be handy as well.

The cream on the cake is some industrial laundries have had well over 400 washes from our food industry garments. Some companies have literally got over 5 years of wear from our garments.

Our gumboots speak for themselves. They have a footbed in them, so they are super comfy. They are a wide fit (but not so wide that they are sloppy). We got creative with the factory too and developed a PVC/Nitrile mix so they last well without cracking or wearing through the sole.

SMARTZONE FOOD INDUSTRY FOOTWEAR AND CLOTHING SYSTEM

Streamline your operation by using the Smartzone colour coding range and help prevent cross contamination.

Using colour effectively in a well-planned program helps improve food safety by preventing workers from mixing products that shouldn't be mixed, keeping pathogens or allergens from travelling from one part of the plant to another. Plus, colour helps organise procedures in the workplace, enabling workers to make decisions quickly and more accurately.

Colour supports safe, efficient waste disposal and helps reduce waste in general. In areas including transportation, inventory, motion, and loss of product, certain colours have become standard:

BLUE for seafood, RED for High risk, GREEN for produce, WHITE for finished food and YELLOW for hazardous areas. Orange is sometimes used for allergens.

- This system will provide you with the perfect solution to the following challenges:
- Eliminates risk of Cross contamination
 - Instant recognition from great distances
 - Segregation of zones for hygiene
 - Packaged goods versus goods in process
 - Prevents transition of PPE between different zones – eliminate wastage.

Please contact your sales rep for info on lead times and quantities on all Smartzone products.

ARGYLE FOOD INDUSTRY OVERALL
SMARTZONE Polycotton Zip Closure

AVAILABLE IN 2 DIFFERENT WEIGHTS:
190GSM OVERALL Code FONPCLSZ in sizes 4-14, 16 & 18

EMBROIDERY & PRINT OPTIONS

WHAT WE OFFER

We now offer embroidery and print options for company branding.

We can save you admin and operational time by having your garments branded before they leave us.

We offer 5-7 working day turnaround

A selection of branding examples we have produced for our distributors

BRANDING OPTIONS

BRANDING OPTIONS

DIGITAL TRANSFER PRINTING

Sometimes what is needed is a cost effective, high-detail logo on your workwear. This is when Digital Transfer printing comes into its own. Digital Transfer printing is great for capturing highly detailed or photographic images.

EMBROIDERY

The favoured branding option for logos on woven fabrics such as the heavier cotton and polycotton fabrics used in workwear. Embroidery will give excellent brand recognition on garments, and remain looking good throughout the life of the garment.

SCREEN-PRINTING

Screenprinting also gives you a high details logo, allowing you to include even the smallest details, and gives you a crisp, sharp edge line. Screenprinting is also very cost effective and available in a range of applications.

IT'S A SIMPLE PROCESS

STEP 1

Send through the logo for our team to price. We will need:

- Logo in .jpeg and .eps formats
- Sizes of logo to be applied
- Whether your client would like print or embroidery

STEP 2

Our team will send you a branding positioning file for you to fill in while you are waiting for the price.

STEP 3

Once pricing is confirmed and you are ready to proceed, our team will set up a specific branding file for this logo so it can be used for future orders as required.

STEP 4

Place your order noting that branding is to be added to the garment and note the logo name, and our team will do the rest.

BRANDING TIPS, HINTS, AND RECOMMENDATIONS

RAINWEAR

With rainwear we recommend either a screen-print or a digital transfer print to be the best branding options as they do not penetrate the fabric. Embroidery penetrates the fabric with every new stitch and will increase the risk of garment failure and cause a significant leaking issue.

WORKWEAR

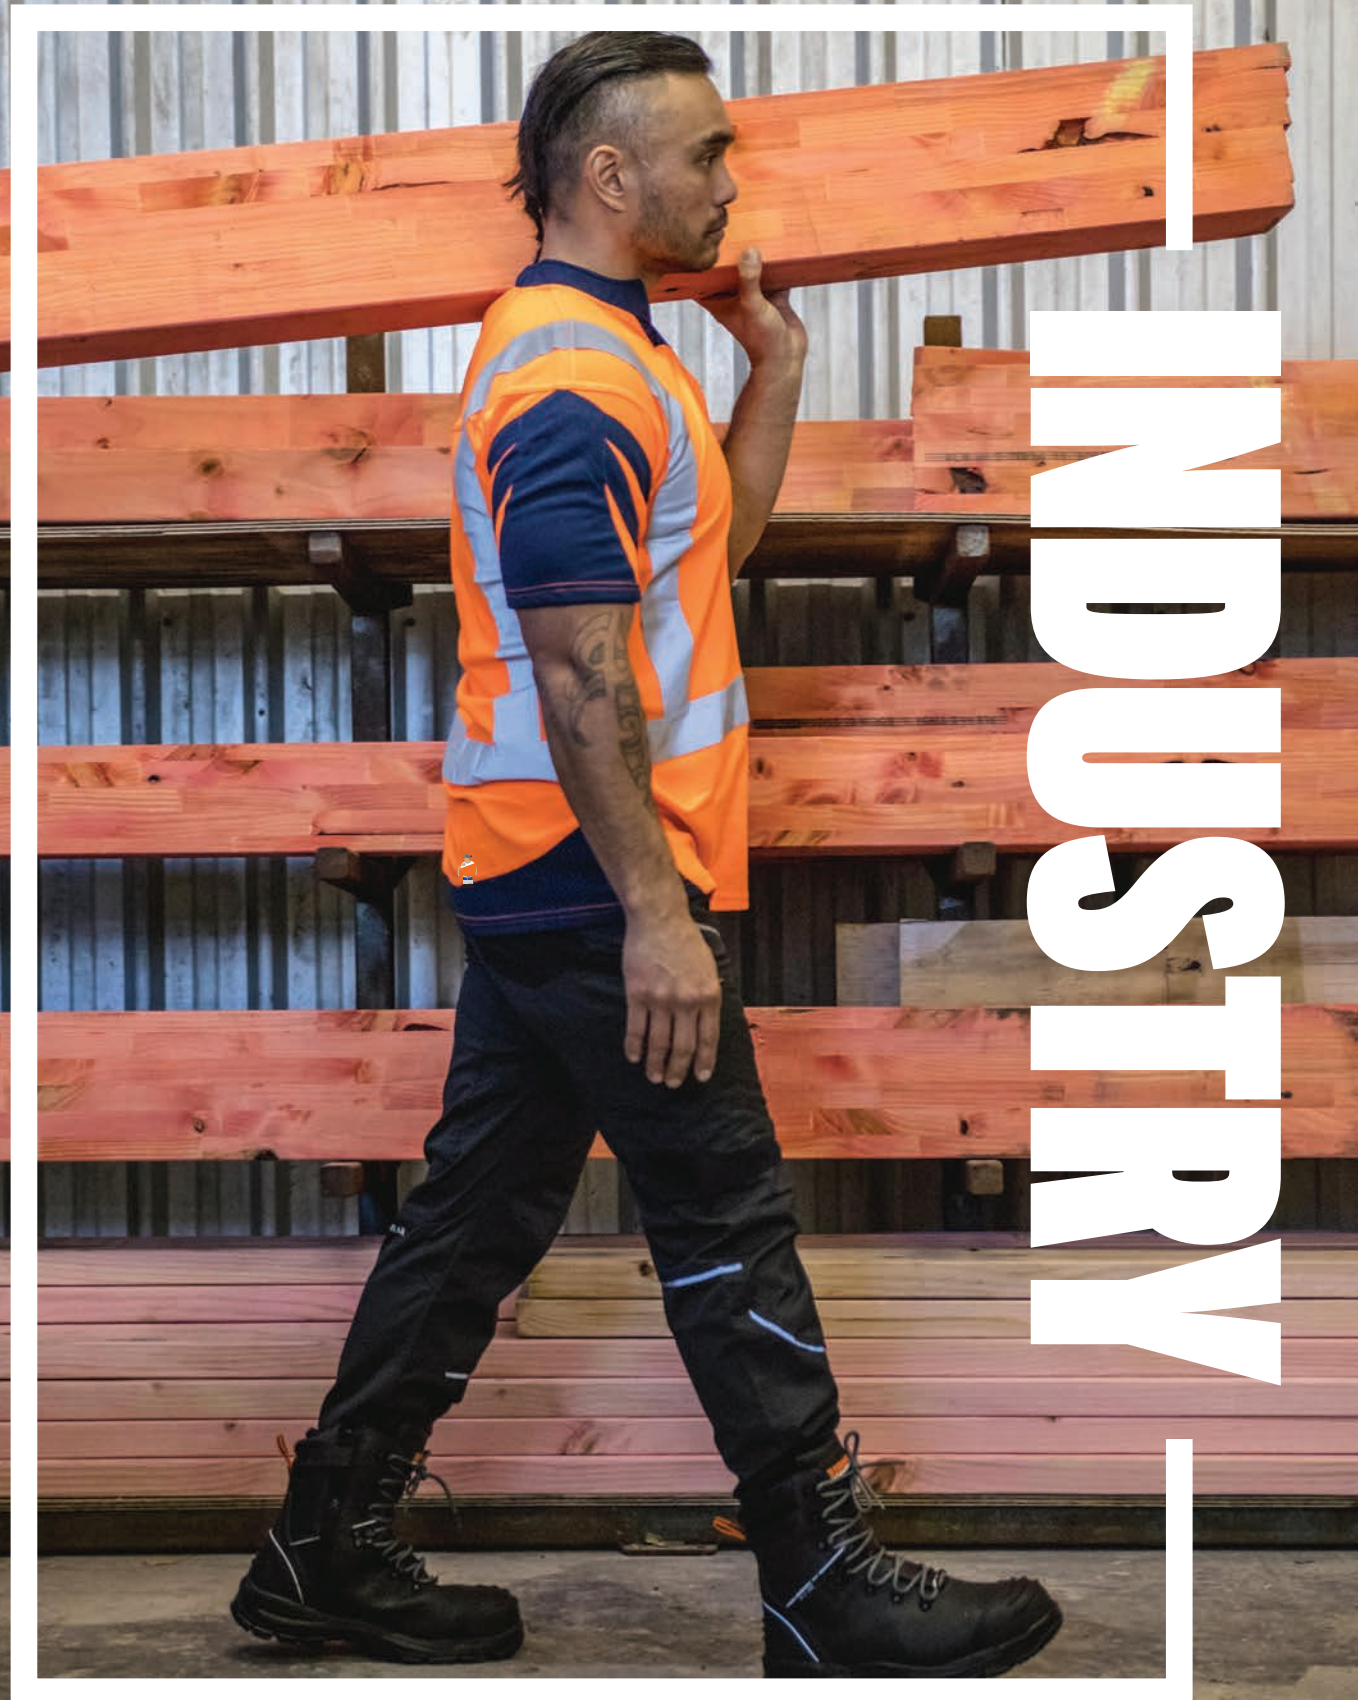

With workwear the options are quite broad. The best options from a quality of image perspective is the Digital Transfer Print and Embroidery. Screen-printing does not always come out crisp on woven fabrics as the outline of the image or logo has to follow the texture of the fabric.

GARMENT SELECTOR BY INDUSTRY

Choosing your workwear is not just about personal preference. Different garments are specifically designed for different jobs to ensure maximum comfort and protection. To make it easy to select the right garment for the right job, check out our garment selector as follows.

Construction and Trades	184-187
Infrastructure and Roothing	188-190
Agriculture and Forestry	192-196
Oil & Gas	198-199
Mining	200-203
Manufacturing	204-209
Utilities	210-211
Food Industry	212-215

Model wearing PNOCBWLW ONA polo, TRBPCLW CHA trousers, TBTTS FLE socks and XTZ-100 boots.

10 AM

3 PM

STOP! YOU'RE DOING WHAT AND HEAD TO THE DAIRY.

PULL UP A FEW — and — PUT THOSE BOOTS UP

Because it's

Smoko

SPIN SOME YARNS

Time

CRACK SOME GOOD ONES

REMEMBER: Always blow on the pie.

Watch some YouTube in The Bog

Have a scroll

THEN GET BACK TO IT

ADD: A SQUIRT OF SAUCE

Mince Pie, Steak Pie, Steak & cheese, steak & onion, steak and mushroom, pizza pie, potato top pie, butter chicken pie, bacon & egg pie, pie sand which, mince + cheese...

SIZING SPECS

PLEASE NOTE: These sizing specs are the measurements of the wearer not the garment measurements. These measurements allow for clothes to be worn underneath, where applicable.

*Due to the wider fit on the XT Safety Boots you may find you are a size or two smaller than your usual safety boots.

CARING FOR YOUR WORKWEAR

The correct wash cycle, care and storage of your workwear is important for its longevity, function and ongoing comfort. The right care is also conditional in order to guarantee specific functions in the garment. An example is that a Hi-Vis garment may be less effective and therefore, less safe if it is dirty. Please read and become familiar with the following care and washing instructions.

WASH

Every product has specific washing instructions, which it is important to follow. They are suited to the particular garment's material and design. Where the washing instructions say "wash separately", this should be done. Alternatively, the garment can be washed with similar colours. We at Argyle Performance Workwear estimate that woven materials will shrink up to 3% and knitted material/jerseys up to 5%. Avoid shrinkage by ironing your clothes after washing them. Certain clothes may need to be shaped somewhat to retain their form. When we say 'shaped' we mean, you may need to hang dry them on a shaped hanger or lie them flat in their natural shape to dry. It is also important that zips, buttons and Velcro closures are closed when the garment is washed. This reduces wear and tear on them and lengthens the garment's life.

PRE-WASH

The garments do not normally need pre-washing. In case of heavy soiling, pre-wash can be used, with the same quantity of detergent as used in the main wash. Do not soak the wash in advance as undissolved detergent can damage garments.

DETERGENT

Use laundry detergent for coloured garments. Do not use laundry detergent containing bleach. Check that the laundry detergent is intended for the garment's wash temperature. Follow the washing instructions on the laundry detergent pack. Please be aware that fabric softeners can damage certain fabrics and their functions. For example, the breathability of water-repellent membranes can be impaired. We do not recommend the use of fabric softeners.

DRYING

We do not recommend tumble drying as an everyday solution. It is best to shake and smooth out the fabric, hang up or dry flat. If you do choose to tumble dry, follow the label temperature guide and do not allow the garment to dry completely as the greatest wear and shrinkage risk occurs at the latter stage of drying. Check the garment label carefully as there may be exceptions.

Rainwear garments are not recommended for tumble drying as high temperatures can damage the seam sealing.

INDUSTRIAL WASH

Industrial wash involves a large scale, professional laundry environment, in contrast to home laundry. Argyle Performance

Workwear garments that state maximum wash temperature 75°C are suitable for this type of laundry. The ISO 15797 certification deals with industrial washing and drying, temperature, detergents and reactive substances which may be used. We recommend a trial wash at the intended laundry before committing your garments to this. You may need to trial the laundry for 3 to 4 wash cycles to get an accurate understanding of how they perform.

DRY-CLEANING

Most dry cleaning processes use perchloroethylene. We recommend you first check the care label to check garments are suitable for dry-cleaning as there may be exceptions. **Please note Polo's are not suitable for dry-cleaning.**

HIGH-VISIBILITY GARMENTS

Soiling impairs the visibility of the Hi-Vis garment. For this reason, it is important to wash them frequently and to follow the washing instructions. Never wash Hi-Vis garments with laundry detergent containing bleach, because this impairs the garment's luminance. Hi-Vis clothing can be stored in a dry, well-ventilated space. Where garments need repairing, this must be done using fabric and thread that meets the garment's standard.

Garments should be stored in such a way to limit fading of fluorescent material and to prevent degradation of reflective material by excessive heat.

Garments should be inspected on a regular basis and replaced if they are badly damaged, soiled or faded, or retro-reflective tape has ceased to be fit for purpose. Failing to do this could potentially put the wearer at risk of non-compliance to AS/NZS 4602.1:2011 + Amdt No.1: Nov 2016 and/or TTMC-W17 standards.

FOOTWEAR

In order to fulfil the safety stated characteristics, it is important that the shoes are always used and tied correctly. Also pay attention if the shoes are subject to heavy wear – check that the soles, seams and uppers are intact. Clean the shoes regularly with a brush, remove any spots with a damp cloth and use shoe cream or wax on the leather uppers. Never clean shoes with substances such as petrol, acids or solvents. The shoes should be stored in a dry, well-ventilated space. Never dry shoes next to a heat source such as a stove, radiator or drying cabinet. It is best to let them dry slowly in a well ventilated room at room temperature.

A MESSAGE FROM ARGYLE PERFORMANCE WORKWEAR

YOU'RE WEARING OUR PLEDGE

We are here to *PROTECT* the *WORKERS* - Big workers, small workers, hard workers, strong workers and the quick workers. We protect the odd lazy worker too. We're with the workers from the North and the South, from all over New Zealand! Heck even the Aussies, we're good like that.

We believe in working hard no matter the weather, that working on cold mornings, in the blistering sun, in the dark, in the harshest of rain and snow is all part of the job - and that we're here to make it easier. To *ENHANCE* your work and to *PROTECT* you from the elements. To stay with you for the long haul. We'll be with you on those 12 hour shifts, 6 day stints, 60+ hour weeks. When you're away from your families we've got your back. To make the mornings less cold and to shield you from the sun. To help you bend and flex to do your job without restriction - without limits. We believe you can enjoy your work.

We believe working with your mates everyday is next level. That getting your hands dirty is therapy. We believe the sound of Jake Brakes are bliss. That the smell of cut timber is invigorating. We believe in the magic of early mornings, late nights, carving out your future and your life by working damn hard everyday. We believe in doing the work to achieve your goals. To work hard so you can play hard, so that you can support your family and live your best life.
